To Interested Companies:

Our Mission: *To cultivate a newer and brighter future for upcoming generations by enabling them to approach real-world problems creatively and intuitively through their experience in STEM and robotics. At Centreville, our mission is to encourage STEM education in our community and worldwide by using our interests to spike the interests of others.*

Thank you for your interest in sponsoring our robotics program. It's generous donors like you that make our program possible. As a student run community organization, we rely solely on grants and funds from sponsors like you. We use these funds to purchase robot parts, go to competition, and other materials needed to create a successfully working robot. Every contribution makes a real difference!

Since the start of our outreach program, our team has reached over 30,000 people and completed over 1,000 hours of community service. This provides us with the opportunity to not only enact change in our community, but our students also develop useful business and STEM related skills that they can carry throughout their careers. Through the FIRST program, our team has been given a voice and has been able to advocate for STEM at the local, state, national, and international level. When companies like yours sponsor Centreville Robotics, they aren't only sponsoring the construction of a robot, they are sponsoring the growth of a new generation of STEM workers.

Introduction to FIRST:

FIRST: For the Inspiration and Recognition of Science and Technology

Slogan: "To create a world where science and technology are celebrated...where young people dream of becoming science and technology heroes"

Basics of FIRST:

FIRST, an international organization promoting STEM, was established by Dean Kamen in 1989. The organization works to "inspire young people's interest and participation in science and technology". It operates FIRST Lego League Jr, FIRST Lego League, FIRST Tech Challenge, and FIRST Robotics Competition. Most recently, FIRST Global was added.

FIRST Philosophies:

FIRST involves the philosophies of Gracious Professionalism and Coopertition. These values are seen as cornerstones of the program which promotes friendly competition and respect throughout rigorous competition seasons. Below are in-depth descriptions of the ideals.

Gracious Professionalism: “Encourages high-quality work, emphasizes the value of others, and respects individuals and the community...fierce competition and mutual gain are not separate notions.”

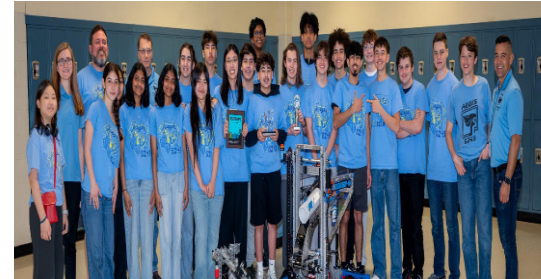

Coopertition: “Displaying unqualified kindness and respect in the face of fierce competition.” It involves learning/teaching teammates, learning from mentors, managing and being managed. The team in essence means assisting and enabling others when you can.”

More than Robots:

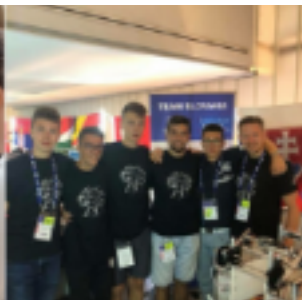

FIRST promotes the phrase “More than Robots”, because FIRST participation encourages students to pursue secondary-education and careers in STEM fields. The term has two main aspects of influence: promoting STEM awareness and encouraging innovation and entrepreneurship in STEM.

Introduction to Centreville Robotics:

Ten years ago in the fall of 2013, our team was founded upon a single notion; everyone can make a difference. Our team consists of a group of nearly 40 determined individuals who each strive to uphold the team’s goals to touch the minds of members from all around our community. This year we have one FRC team and one FTC team.

Together, we have created an identity for ourselves in our community, county, state, and nation, by reaching out and hosting numerous STEM-related outreach events, creating a four-year STEM-based educational plan at our high school, working with the Virginia High School League to make robotics a state-recognized school activity, and even lobbying for increased STEM funding at the National Advocacy Conference in DC. Furthermore, we are seeking to expand our impact with several future plans that include the creation of STEM and robotics summer camps, partnerships with teams from FIRST Global, and more. By bringing people together with our outreach, not only has our team laid the foundation for STEM awareness in our community, but we are establishing a new generation of STEM workers.

Sponsorship Levels:

FRIEND of Centreville Robotics (Up to \$250)

- Sponsor logo/name on team website:
Centrevilleroobotics.org
- Personal thank you letter from our team

BRONZE Level Sponsor (\$250 - \$499)

- Company logo on team shirt
- Social Media promotion
- Sponsor logo/name on team website:
www.centrevilleroobotics.org
- Personal thank you letter from our team

SILVER Level Sponsor (\$500 - \$999)

- Company logo on team banner
- Listed on team brochures, presentations, etc
- Company logo on team t-shirt
- Social media promotion
- Sponsor logo/name on team website:
www.centrevilleroobotics.org
